

Kolloquium zur Bodenkunde WS 2019/20

Zeit: Donnerstags, 16:15 – 18 Uhr

Ort: Raum 007 (Gebäude 4109), Herrenhäuser Str. 2, 30419 Hannover

Datum	Referent/in	Thema
05.12.2019	Dr. Michele Innangi, Università degli Studi della Campania Luigi Vanvitelli, Caserta, Italy	"A multidisciplinary approach to soil ecology"
12.12.2019	Amir Golpavar, UFZ Helmholtz Zentrum für Umweltforschung, Leipzig	"High-Resolution Modelling of Microbial Biodegradation in Unsaturated Porous Media"
16.01.2020	Prof. Yosef Steinberger, Bar Ilan Universität, Ramat Gan, Israel	"Soil Biota Community: Composition, Diversity and Dynamics in Terrestrial Extreme Ecosystem"
23.01.2020	Dr. Insa Kühling, Martin-Luther-Universität Halle- Wittenberg	"Cropping systems performance and sustainable intensification from a soil perspective"
30.01.2020	M.Sc. Jan Zawallich, TU Clausthal	"High-resolution Simulation of Denitrification"
06.02.2020	Dr. Christoph Haas, ZALF, Müncheberg	"Millimeter-scale experiments to quantify macropore-matrix mass transfer of solutes and gases in structured soils"

Gäste sind herzlich willkommen!

Die Dozenten des Instituts für Bodenkunde der Leibniz Universität Hannover
